- ARPACIOĞLU O *see* Özgül A
- Arthritis
acute microcrystalline, seasonal variation in the onset of, 1003
angiogenesis and, 103
antigen-induced, liposomal clodronate eliminates synovial macrophages, reduces inflammation and ameliorates joint destruction in, 818
bibliometric methods for the evaluation of research, 13
crystal, management of, (E) 912
detection of mycobacteria in joint samples from patients using a genus-specific polymerase chain reaction and sequence analysis, 547
early
depressed proliferative responses by peripheral blood mononuclear cells from patients to mycobacterial heat shock protein 60, 631
immunohistological analysis of synovial tissue for differential diagnosis in, 1074
early inflammatory, collagenase, cathepsin B and cathepsin L gene expression in the synovial membrane, 34
effects of interferon beta treatment on, 362
eosinophilic 1188
glomerular and tubular proteinuria as markers of nephropathy in, 28
inflammatory, granzetron (Kytril) suppresses methotrexate-induced nausea and vomiting and is superior to prochlorperazine (Stemetil), 280
and interleukin 10, (E) 293
peripheral benzodiazepine receptor ligand PK 11195 inhibits in the MRL-lpr mouse model, 1068
psoriatic *see* Psoriatic arthritis
quantitation of interferon gamma- and interleukin-4-producing T cells in synovial fluid and peripheral blood of patients, 214
rabbit antigen-induced, effects of soluble interleukin-1 type II receptor on: clinical, biochemical and histological assessment, 401
reactive
Chlamydia pneumoniae as a triggering infection, 411
